Daniel Sindunata

FULL-STACK DEVELOPER

A developer with an operational mindset. I build practical software that solves real business problems, combining experience in operations, data, and full-stack development.

EXPERIENCE

Jul 2026 – Present

Full-Stack Developer

Right Side People Pte Ltd

Developing and maintaining internal web applications for corporate operations, including master data management, financial transactions, reporting, and collaborative tools. Working on event management systems and internal productivity tools.

Next.js · TypeScript · Tailwind CSS · Prisma · MariaDB · Nginx · Docker

Mar 2026 – Jul 2026

Business Operational Developer

Saladnyoo (F&B)

Built operational dashboards and internal tools to support store operations, production, and procurement. Worked with data from ESB ERP and various sources to improve visibility and decision-making.

Python · PostgreSQL · Power BI · Looker Studio · Excel

2024 – 2026

Internal System Developer

Dallas Meat Semarang

Developed internal systems to support the family business (meat processing service), including inventory management, procurement tracking, and accounting system setup (Accurate). Automated manual processes and improved data accuracy and operational efficiency.

Excel · Accurate · SQL · Python

EDUCATION

Jan 2026 – Aug 2026

Data Analyst Bootcamp

Dibimbing.id

Learned SQL, data analysis, reporting, and data visualization.
Built projects using Python, Excel, Power BI, and Looker Studio.

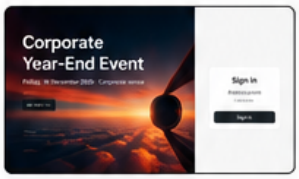

2015 – 2017

Advanced Diploma of Hospitality Management

William Angliss Institute, Melbourne

Studied hospitality management with a focus on operations, service, and business fundamentals.

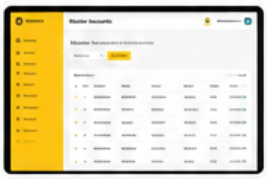

SELECTED PROJECTS

Corporate Event Management Platform

End-to-end event platform with registration, QR check-in, live activities, and admin tools.

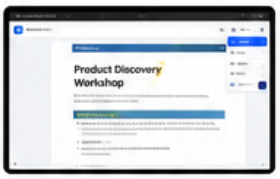

Next.js · TypeScript · Tailwind CSS · Prisma

Internal Operations Portal

Master data management, financial transactions, reporting, and operational tools for internal use.

Next.js · TypeScript · MariaDB · Tailwind CSS

Collaborative Infinite Whiteboard

Real-time collaborative whiteboard with infinite canvas, boards, and exports.

Next.js · WebSockets · Canvas · Tailwind CSS
